HI-VIS Innovation

2026/2027

Welcome to Korntex!

WE MAKE TEAMS WORK!

Korntex, a medium-sized company based in Stuttgart, the heart of Swabia, specializes in high-visibility (Hi-Vis) products and places the highest value on speed, efficiency, and quality. Our passion is to put your satisfaction first and become the leading provider of workwear and occupational safety in Europe. We see ourselves not just as a manufacturer, but as a partner committed to meeting your individual needs. At Korntex, it's about more than products – it's about long-term partnerships. Welcome to Korntex, your reliable partner for Hi-Vis products and occupational safety!

Designed and Developed in Germany

Our expert development team in Stuttgart is responsible for the innovative design of new products. The outstanding textile designs also originate from this vibrant city. Korntex exports its products to nearly every corner of the world, thereby making a significant contribution to strengthening the domestic economy.

In our commitment to making a positive impact on the environment, our textile company passionately embraces social and ecological responsibility. Our entire production chain is focused on promoting ethical labor practices and eco-friendly materials. From the cultivation of our raw materials to the manufacturing of the final products, we ensure fair wages, safe working conditions, and sustainable production processes. We support adherence to the highest environmental standards and actively advocate for the protection of workers' rights. Each of our products tells a story of commitment to a better world—a story we proudly showcase in our sustainable textiles. In recognition of these achievements, the German Innovation Institute for Sustainability and Digitalization has honored us with the "Employer of the Future" seal.

Protecting Your Data (TISAX)

The protection of sensitive information plays a central role in our company philosophy. Through a carefully implemented Information Security Management System (ISMS), we safeguard our customers' data. This commitment is further reinforced by our TISAX certification, one of the highest standards for the comprehensive protection of sensitive information. Customers can trust that their data is in safe hands with us.

Disclaimer

The colors shown in the catalog may slightly differ from the original, as they can appear differently depending on the light source. Exact reproduction of textile colors in print is nearly impossible, especially for neon colors. We pay close attention to your feedback and continuously work on improvements. Therefore, our products may show minor variations across different production batches, such as in the color of hems or hook and loop fasteners. If you order larger quantities, we are happy to send you a sample so you can check the colors. Please note that slight differences in fabric color may occur depending on the batch.

“

**FOR A SUSTAINABLE
FUTURE**

SUSTAINABLE AND SAFE:

“TAKING RESPONSIBILITY BEYOND THE VEST”

At Korntex, we are aware of our responsibility towards the environment. Our goal is to make the ecological footprint of our products transparent and to reduce it step by step.

In 2021, the independent organisation Fokus Zukunft reviewed our entire value chain and calculated the CO2 emissions per high visibility vest produced. This tells us where our emissions actually occur, so we can address them at the source.

Building on those figures, we were one of the first companies in our industry to additionally finance certified climate protection measures outside our own value chain. The starting point was the “Paris” safety vest in 2022.

Specifically, we are investing in the construction of a wind farm in China. It generates clean energy equivalent to the calculated electricity demand for the production of our high visibility vests. At the same time, the project helps reduce the use of climate damaging lignite in the region, keeping fossil resources in the ground.

We have continued along this path: the “Hamburg” multifunctional safety vest (art. KXCMF) followed in 2023, and since 2024 our kidswear collections “Action Line” and “Funtastic Wildlife” have been included as well.

We will continue to support climate protection projects worldwide. Join us on this journey, because together we take responsibility for tomorrow.

Dr. Alexander A. Jurack
Founder of Korntex

EN ISO 20471

1
2
3

This standard specifies the requirements for high-visibility warning clothing.
The warning clothing must ensure high visibility of the wearer under all lighting conditions:

- The wearer must be clearly visible in daylight, under vehicle headlights at night, or when viewed through other technical devices.
- The performance requirements of the standard relate to material colors, the minimum area of the materials, retroreflection, and the placement of reflective stripes on the warning clothing.

MINIMUM AREA IN M ² – EN ISO 20471			
Class	Class 1	Class 2	Class 3
Fluorescent Materials	0,14 m ²	0,50 m ²	0,80 m ²
Reflective Material	0,10 m ²	0,13 m ²	0,20 m ²

“COMBINE TOPS AND TROUSERS TO ACHIEVE A HIGHER CLASS ACCORDING TO EN ISO 20471!”

CLASS 2

KXMFGS + EOS - SHORTS

CLASS 3

EOS - T-SHIRT + EOS - SHORTS

CLASS 3

EOS – SWEATSHIRT + EOS – TROUSERS

*Classification may vary depending on the product size.

*The highest class in the standard is Class 3.

EN 17353

Standard for Optimal Visibility!

Since November 1, 2020, this standard has replaced EN 1150 and EN 13356, which defined the requirements for high-visibility equipment in the form of garments or products. Such equipment must be able to visually signal the presence of the wearer.

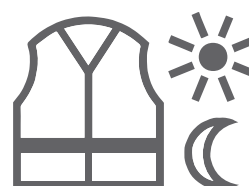

High-visibility equipment is intended to make the wearer conspicuous in medium-risk situations, under all daylight conditions and/or when illuminated by vehicle headlights in the dark.

INTERVIEW ABOUT THE NEW SECURITY COLLECTION

To kick things off, we speak with two key figures behind the collection. **Bostjan Berglez**, Head of Marketing, leads the conversation with **Sophia Peric**, Head of Fashion Design, and **Manfred Harscheid**, Head of Sales and Product Development. The collection is aimed at professional security services, combining innovative features with a modern, confident appearance.

BB

Sophia, the new collection brings fresh ideas to the security sector. What inspired you during its development, and what aspects did you place particular emphasis on?

Thank you. The Security collection emerged from direct exchanges with security services. We wanted to develop products that provide real support in everyday work. For this, we selected durable materials and designed pieces that convey professionalism while remaining highly ergonomic. The collection is intended to combine protection, comfort, and a confident appearance.

SP

BB

From a commercial perspective, this collection is an important step, Manfred. What technical features distinguish the new line?

The collection has been designed for high durability and meets strict requirements for resilience. A key focus for part of the collection was visibility at night, which is why we use modern, highly noticeable reflective elements. Additionally, we developed modular pocket solutions, allowing the vests to be used flexibly for different tasks. This combination of durability, functionality, and everyday practicality makes the line so valuable.

MH

BB

Sophia, fit and freedom of movement are essential in the security sector. How did you approach the design process?

We wanted cuts that allow for dynamic movements and fit the body well. Every seam and pocket was tested repeatedly. Feedback from the field was incorporated directly into the development. Our goal was a collection that feels like a reliable work tool.

SP

Conclusion:

The Korntex Security collection combines durable materials, clear designs, and practical functionality. With this product line, **Sophia Peric** and **Manfred Harscheid** have met the demands of the security sector while setting new standards in comfort and visual presence.

A man and a woman are posing in a minimalist studio setting. The man, on the left, is smiling and has his arms crossed. The woman, on the right, is wearing a black cap and has her hand on her hip. Both are wearing black long-sleeved shirts, black tactical pants with multiple pockets, and black belts. The background is a plain, light-colored wall and floor.

STANDARDS AND CERTIFICATIONS

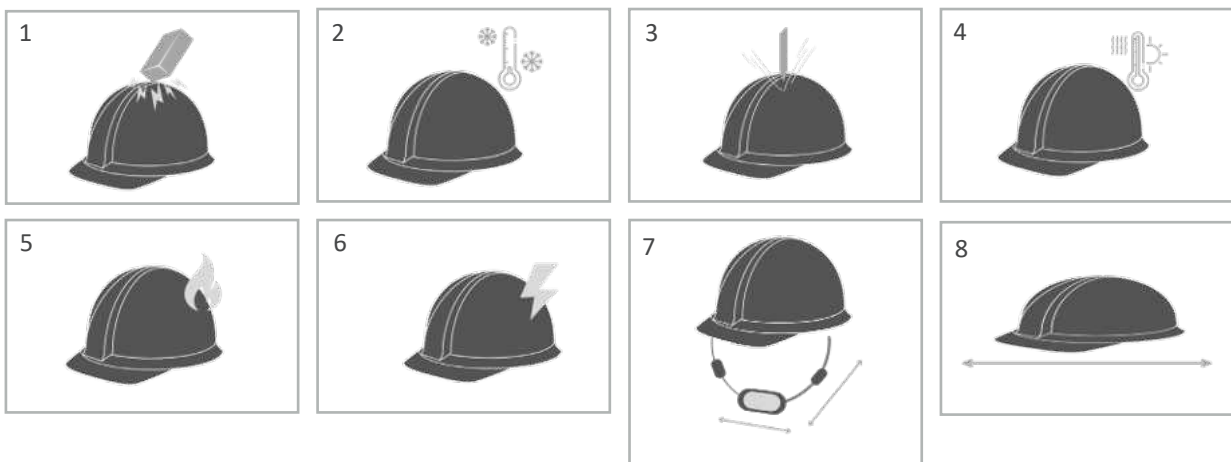

**EN 397:2012+A1:2012**

The European standard for safety helmets (EN 397) provides manufacturers with guidelines to ensure that helmets adequately protect the wearer. It also defines the testing requirements for safety helmets, as they must be designed to protect the wearer from falling objects. Such protective measures safeguard the user against potential consequences like brain injuries or skull fractures. The standard also includes protection against lateral deformation of the helmet.

The helmet consists of two main components: the hard outer shell and the internal suspension system.

All helmets certified according to EN 397 must meet the following requirements:

- 1 - Shock absorption, vertical
 - 2 - Protection against low temperatures (-20 °C or -30 °C)
 - 3 - Penetration resistance (against sharp or pointed objects)
 - 4 - Protection against very high temperatures (+150 °C)
 - 5 - Flame resistance
 - 6 - Electrical insulation (440 V)
 - 7 - Chin strap attachment: chin strap releases at min. 150 N and max. 250 N
 - 8 - Lateral deformation
-

GLOVES

GLOVE STANDARDS

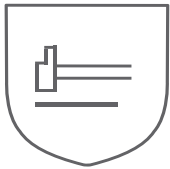

EN ISO 21420:2020

This standard defines the general requirements and relevant test methods for glove design and construction, harmlessness, comfort, and performance, as well as the labeling and information provided by the manufacturer, which apply to all protective gloves.

The general requirements for protective gloves include:

- Standardized sizing
- Gloves should pose no risk or cause injuries or allergies
- Glove material should have a pH value between 3.5 and 9.5 (neutral)
- The maximum allowable value for Chromium VI in glove material is 3 mg/kg
- Labeling of gloves and packaging is also standardized

EN 388

EN 388:2016+A1:2018

This European standard specifies the requirements, test methods, labeling, and information to be provided for protective gloves against mechanical risks such as abrasion, cut, tear, puncture, and, where applicable, impact. This standard is used in conjunction with EN ISO 21420:2020.

- Tumble dryer safe at low temperature
- Adhesive: acrylic hot-melt adhesive
- Thickness in mm: 0.14 – 0.17
- Liner: PET film
- Transfer conditions: temperature: 160 °C, pressure: 3.5 bar, time: 15 sec
- Turn inside out before washing
- Minimum retroreflective values according to DIN EN ISO 20471:2013 + A1:2016

Measures

25 m x 0,5 m

- Material: 100% polyurethane

KXMTAC "SPARTA"

P. 48

Water-Repellent:

Concerns the measurement and certification of the ability of textiles and clothing to repel water. It ensures that products can be labeled as “water-repellent” if they meet certain performance requirements and provide protection against moisture.

CE Marking:

Designation for products that comply with European safety and conformity standards.

EN 1149 Antistatic:

The EN 1149 antistatic standard in Europe refers to the certification and labeling of products that possess antistatic properties.

EN ISO 14116 Flame-Resistant:

It ensures that products can carry the EN ISO 14116 label if they meet the relevant requirements and regulations to prevent the spread of flames and provide protection against fire hazards.

EN ISO 21420 Basic Standard for Gloves:

EN ISO 21420 is the basic standard for gloves in Europe. This standard covers the fundamental requirements for gloves and ensures that products meet the criteria regarding construction, fit, design, and materials.

UKCA Marking:

It ensures that products can carry the UKCA mark if they meet the necessary requirements and regulations for marketing in the United Kingdom after Brexit.

EN 13758-2 UV Sun Protection:

It ensures that products can carry the EN 13758-2 label if they meet the requirements and regulations for protection against ultraviolet radiation and provide effective protection to users.

Dual System:

The “Zentek Dual System” standard in Europe refers to the certification and labeling of products that comply with the standards of the Zentek packaging recycling system.

EN 343 Waterproof:

It ensures that products can carry the EN 343 label if they meet the requirements and regulations for protection against water and provide users with effective protection from wet conditions.

DIN EN ISO 20471:2013 + A1:2016:

It ensures that products can carry the EN ISO 20471:2013 + A1:2016 label if they meet the requirements and regulations for the visibility and safety of workers exposed to risks in work environments.

EN 388 Mechanical Risks:

It ensures that products can carry the EN 388 label if they meet the necessary requirements and regulations for protecting hands against mechanical risks such as cut, puncture, tear, and abrasion hazards.

EN 17353 Type B:

Increased visibility through retroreflective material in the dark.

EN 17353 Type AB:

Increased visibility through fluorescent and retroreflective material in daylight, twilight, and darkness.

EN 17353 Type A:

Increased visibility through fluorescent material in daylight.

ORDER YOUR UNIQUE DESIGN, CUSTOM-MADE ACCORDING TO YOUR SKETCHES

A unique design, specially tailored
to your needs

SPECIAL PRODUCTIONS

A production tailored to your individual wishes offers you many advantages:

The most important quality guarantee is the careful selection of our suppliers. Only by sourcing high-quality fabrics and reflective materials can first-class quality products be created. Therefore, we have been working with well-known companies for many years.

There are no limits to customization. From prints to key rings, you can decide freely. Before production, you will receive a sample for approval so that you can be convinced of the quality of our products. The import process can be handled in four simple steps:

- 1. Concept** Our consulting and design team assists you in implementing your ideas.
- 2. Approval** We start production only once you are satisfied with the samples.
- 3. Production** Experienced and trained staff sew your order.
- 4. Delivery** An optimized supply chain ensures safe and timely delivery.

Feel free to contact us and take advantage of our free design consultation to ensure that your workwear is not only functional but also optimally represents your brand.

Korntex products are optimized for the best printing results

**Personalize with your
company logo**

**Extra-large printing area
for maximum flexibility**
